

Level 3 Consultancy Services

Current Airworthiness Regulations require that all organisations carrying out Non-Destructive Testing (NDT) on aircraft or aerospace products appoint a 'Responsible NDT Level 3', certified in the methods used by the facility. Aerospace Inspection Training Ltd offer Level 3 services to airlines and aerospace maintenance and manufacturing companies throughout the world to provide guidance and oversight of the complete NDT function.

Aerospace Inspection Training Ltd is approved by the British Institute of NDT to act as an 'Outside Agency Level 3' organisation.

All Level 3 staff are all highly qualified, to both PCN/ASNT and EN4179 requirements, and can provide invaluable experience when working to both Level 3 and Level 2 applications of NDT. Our personnel are strategically positioned near Stansted Airport, Norwich Airport, Manchester and Prestwick ready to offer outstanding support in all NDT disciplines. They also carry a vast number of personal approvals allowing us to support Prime specific requirements for the likes of Rolls Royce, Airbus and Boeing.

The services offered by Aerospace Inspection Training will ensure your company's compliance with EASA, FAA and NADCAP requirements, together with any additional NADCAP Prime special documentation.

NDT Level 3 services available by Aerospace Inspection Training include:

- Annual visit(s) to your facility for the purpose of an internal audit and the monitoring of your NDT processes, documentation and surveillance (annual maintenance checks) of your NDT staff.
- The review and approval of NDT procedures, techniques and instructions.
- Production, review and maintenance of your Company's Written Practice.
- Expert advice and ongoing support to cover legislative, technical or practical NDT issues which your company may encounter.
- Quality training and certification examinations for all of your NDT staff to meet regulatory needs.

For more information about our Level 3 services or NDT certifications and training, please visit our website at www.aerospacendt.co.uk or contact a member of our staff. If you wish to receive a quotation for our services, please email: admin@aerospacendt.co.uk

We are happy to provide customer references, which are available upon request.
